

PORTFOLIO

ABOUT US

The secret to a great website or an app is finding the perfect blend of design and programming that really appeals to the end user.

We are a group of Techies where every member of the team is selected based on their unique blend of skills, creativity and work ethic. We like to call it our 'power of plenty' as the combination is a world-class team that delivers top notch digital solutions. All of the team members have a handful of IT Industry experience and have worked with some of the leading IT companies at some or other point of their career.

OUR APPROACH

Quality and overall performance is our paramount concern. We focus on creating effectively informative architecture, aesthetically appealing visual designs, engaging content and great interactivity. More than anything else, we believe in making things happen!

ANALYSIS - We know that the ultimate success of a project depends on having the right plan from the beginning. That's why we work with you to conduct a detailed analysis of your requirements to ensure we are designing a solution that perfectly matches your needs. We really want to get the grass roots of your business and understand exactly what you are trying to achieve so that we achieve it for you!

DESIGN - A good design is one thing, but a great design is groundbreaking. We apply our creative hats to provide you with outstanding, impactful designs that will engage and inspire, whilst seamlessly delivering your brand message and values.

CODE - Great designs can easily be let down by poor back end functionality if developed by the wrong hands. Not at TechIncipient! Our world-class programmers have the experience necessary to ensure that we develop highly functional, reliable coding that fully supports our amazing creations.

REVIEW - we are perfectionists and don't accept anything less! That is why we will not sign off any project unless we are 100% happy that it is the best it can possibly be. We thoroughly review and test our projects prior to launch, to ensure any issues are addressed during the development process.

Comdez InfoTech

Address: - F-2, B-47, Sector -6, Noida-201301 (U.P.)

M: - +91-8700425483 | **E:** - rmishra.0586@gmail.com

OUR SERVICES

- Website development (Custom Website Development, PHP Development, etc.)
- Website designing (Logo Design, HTML PSD to XHTML/HTML, etc.)
- Open source customization/CMS (Joomla, Drupal, WordPress, etc.)
- Ecommerce website development (Magento, OS Commerce, Zen Cart integration etc)
- Programming Services (PHP MySQL Development, PHP Frameworks, JavaScript etc)
- Mobile application development (iPhone, Android, Blackberry, Windows) etc.
- Search Engine Optimization (Google, yahoo, bing).

WHY US

You outsource software development because you want to make your life better.

Sure, there are always logical reasons like cost savings, lack of technical ability and understaffed internal teams. But what you really expect from outsourcing is that you will be able to take the help of experts to fix a business problem that's either a minor distraction or a massive roadblock.

You expect prompt and professional service. You expect reliability. And you expect your money's worth. We have got you covered on all these counts, and many more.
